

Supergroup 6: Typical Traits

The members of this supergroup can be found across the whole of the UK. The supergroup comprises of 4 groups, 6a (2 subgroups), 6b (3 subgroups), 6c (2 subgroups) 6d (2subgroups). There is one ward, Tresco in the South-West, that has all its output areas classified in this supergroup. There are 7 other wards that have 90% or over including, Macclesfield Central and Peel in the North-West, Pierremont in the North-East, Central in Yorkshire and the Humber, Howard Town in the East-Midlands, Copnor in the South-East and Clevedon South in the South-West. Within this supergroup:

The variable with proportions far below the national average is¹

- Rent (Public)

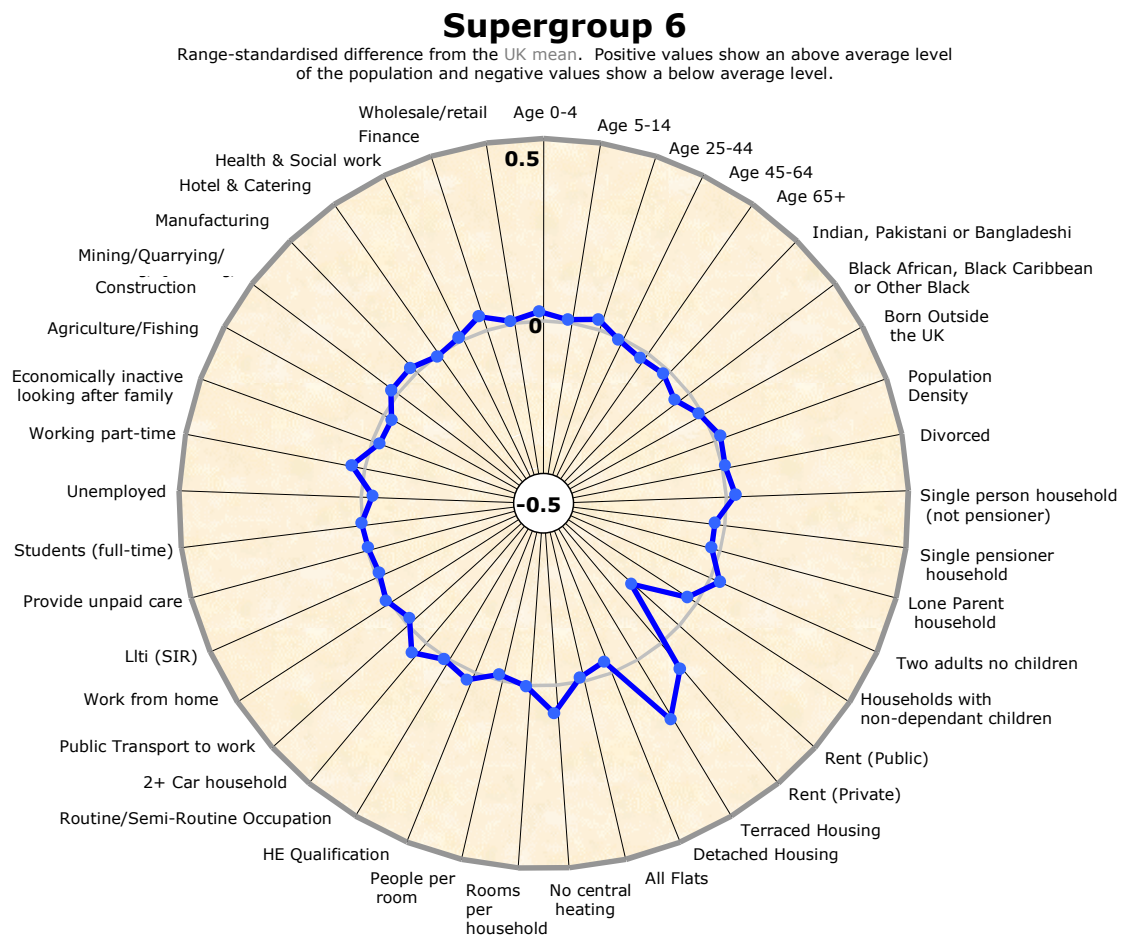

The variables with proportions close to the national average are²

- Single pensioner household
- Provide unpaid care
- Hotel & Catering employment
- People per room
- Indian, Pakistani or Bangladeshi
- Lone Parent household
- Students (full-time)
- Age 45-64

- All Flats
- Born Outside the UK
- Work from home
- Health and Social work employment
- Wholesale/retail trade employment
- Routine/Semi-Routine Occupation
- Age 5-14
- Mining/Quarrying/Construction employment
- Manufacturing employment
- Rooms per household

The variable with proportions far above the national average is³

- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Group 6a: Settled Households

The members of this group can be found in areas of concentration around Sheffield and Manchester. There is one ward, Dodington in South-West, that has 82% of its output areas classified in this group. There are a further 11 wards that have 50% or more including Blandford Damory Down, Clevedon Yeo and Yate Central in the South-West, Lower Morden and Stonecot in London, Moulsham Lodge and Newnham in the East of England, St. Christopher's and Tonypany in Wales, Consett East in the North-East and Elson in the South-East. Within this group:

The variables with proportions far below the national average are¹

- All Flats
- Rent (Public)

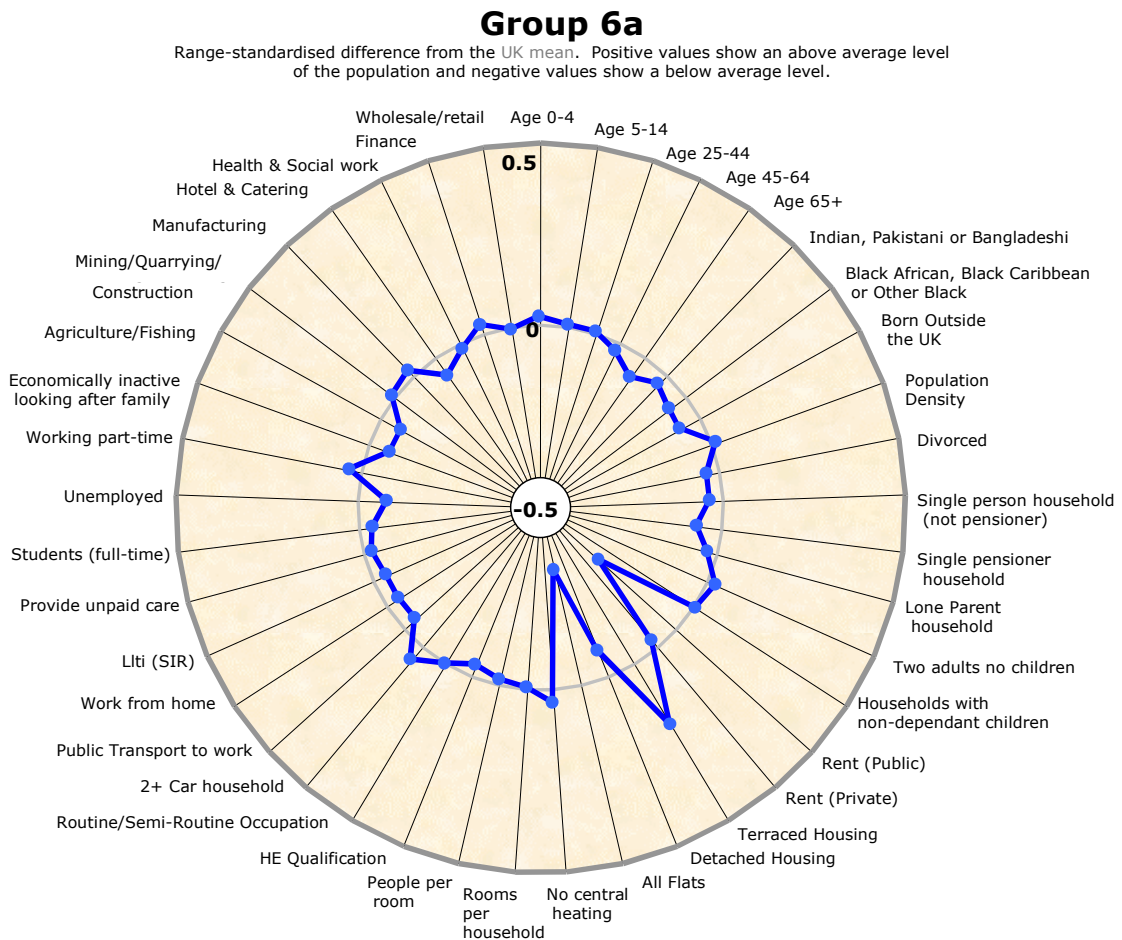

The variables with proportions close to the national average are²

- Indian, Pakistani or Bangladeshi
- Divorced
- Single person household (not pensioner)
- HE Qualification

- Provide unpaid care
- Age 45-64
- Lone Parent household
- Rent (Private)
- Health and Social work employment
- People per room
- Wholesale/retail trade employment

The variable with proportions far above the national average is³

- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Group 6b: Least Divergent

The members of this group are spread through out the UK but not generally in major cities. There is one ward, Tresco in South-West, that has all of its output areas classified in this group. There are another 10 wards that have 55% or more including Axbridge, Blandford Station, Cirencester Watermoor, Kingsbridge North, Portfield and Slade in the South-West, Eastgate and Seckford in the East of England, Sandown North in the South-East and Queensferry in Wales. Within this group:

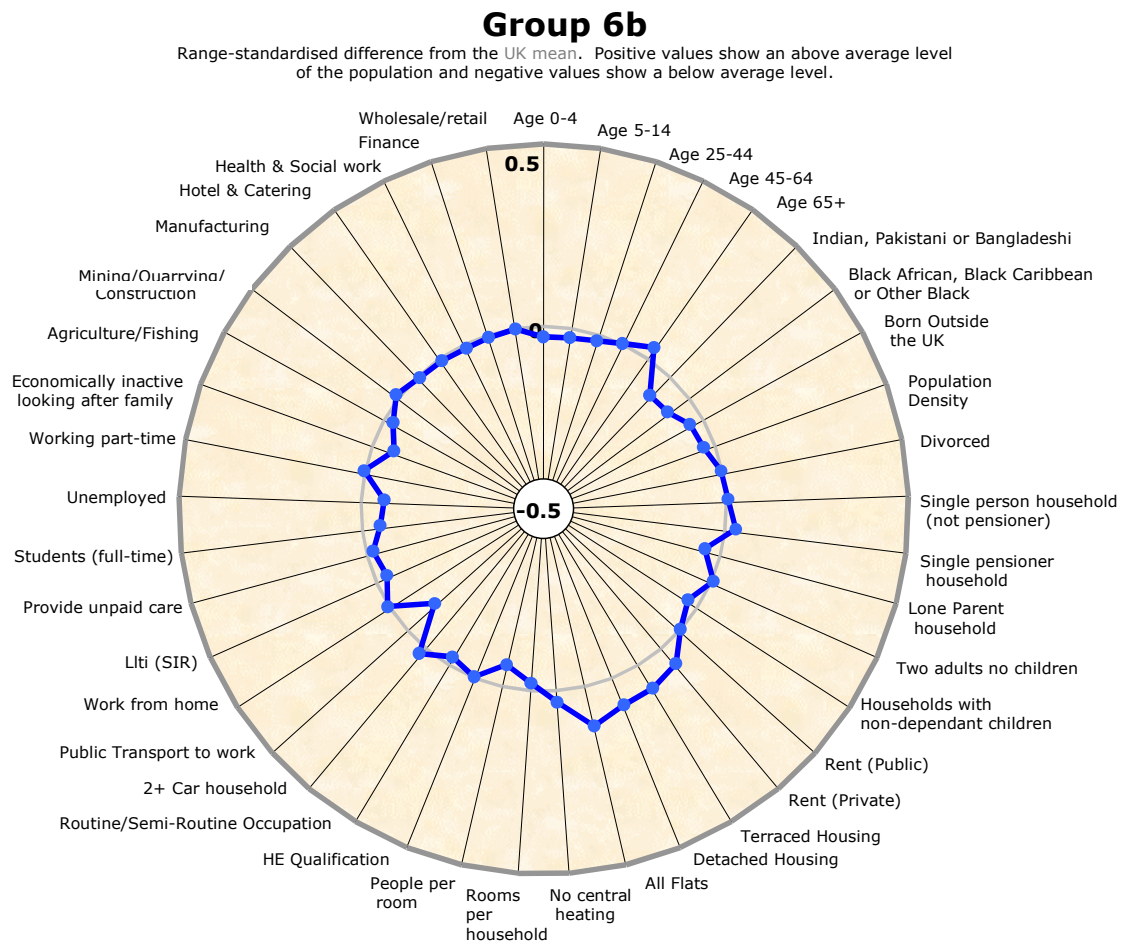

There are no variables with proportions far below the national average ¹

The variables with proportions close to the national average are²

- Age 5-14
- Population Density
- Lti (SIR)
- Agriculture/Fishing employment
- Households with non-dependant children
- Age 25-44

- Health and Social work employment
- Provide unpaid care
- Routine/Semi-Routine Occupation
- Financial intermediation employment
- Hotel & Catering employment
- Manufacturing employment
- Rooms per household
- Wholesale/retail trade employment

There are no variables with proportions far above the national average ³

- 1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Group 6c: Young Families in Terraced Homes

The members of this group can be found in areas of concentration around the cities of the North-West. There is one ward, Central in Yorkshire and the Humber, that has 94% of its output areas classified in this group. There are another 10 wards that have 65% or more including Folkestone Foord, Fratton, Milton and Sheerness East in the South-East, Peel and Victoria in the North-West, Howard Town and St Andrew's in the East-Midlands, Ellacombe and St Thomas in the South-West. Within this group:

The variables with proportions far below the national average are¹

- Detached Housing
- Rent (Public)

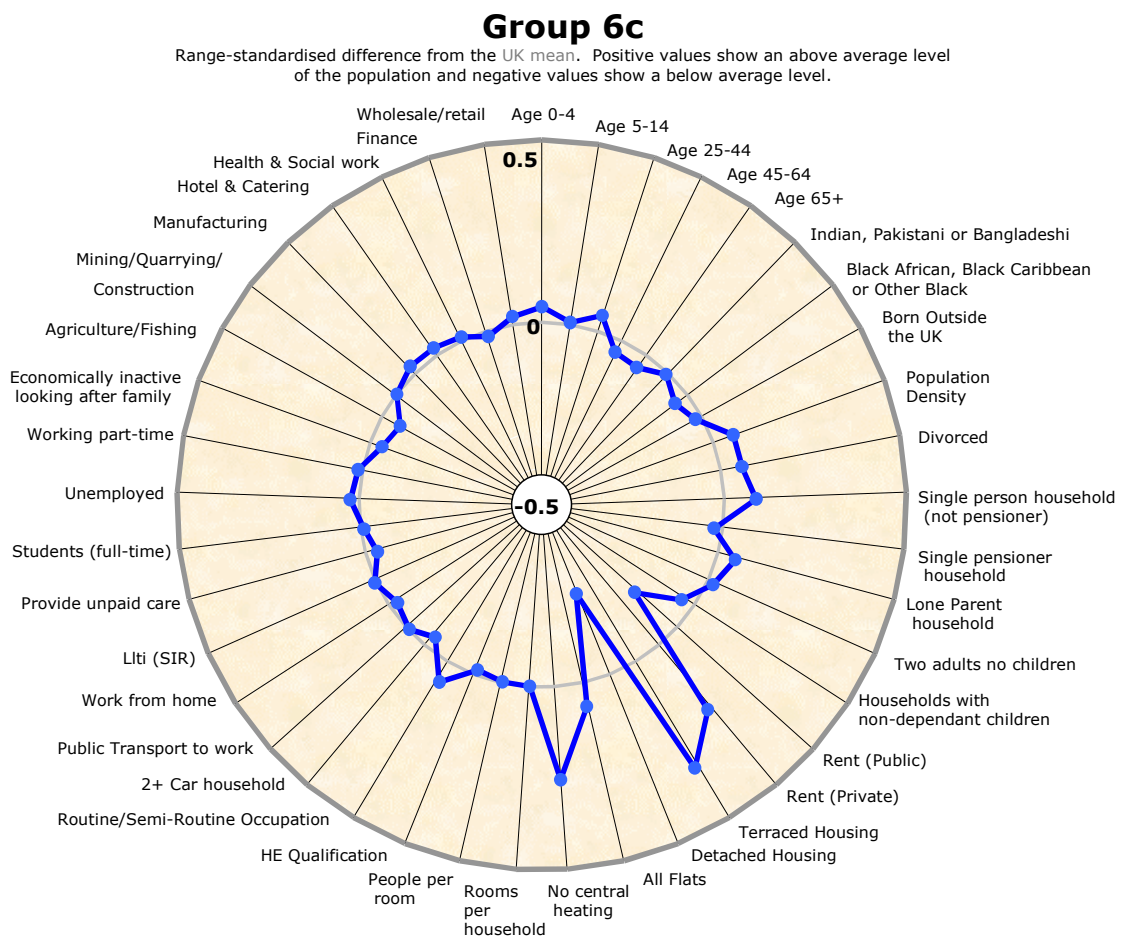

The variables with proportions close to the national average are²

- Single pensioner household
- Financial intermediation employment
- People per room
- Born Outside the UK
- Rooms per household

- Public Transport to work
- Indian, Pakistani or Bangladeshi
- Students (full-time)
- Age 5-14
- Mining/Quarrying/Construction employment
- Lti (SIR)
- Health and Social work employment

The variables with proportions far above the national average are³

- Rent (Private)
- No central heating
- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Group 6d: Aspiring Households

Although the members of this group can be found across the UK there is a higher concentration around the outskirts of London. There is one ward, Bicester South in the South-East, that has 73% of its output areas classified in this group. There are a further 6 wards that have 55% or more including Baldock East, Chafford and North Stifford and Leigh in the East of England, Castle and Rooksdown in the South-East and Bradley Stoke Bowsland in the South-West. Within this group:

The variable with proportions far below the national average is¹

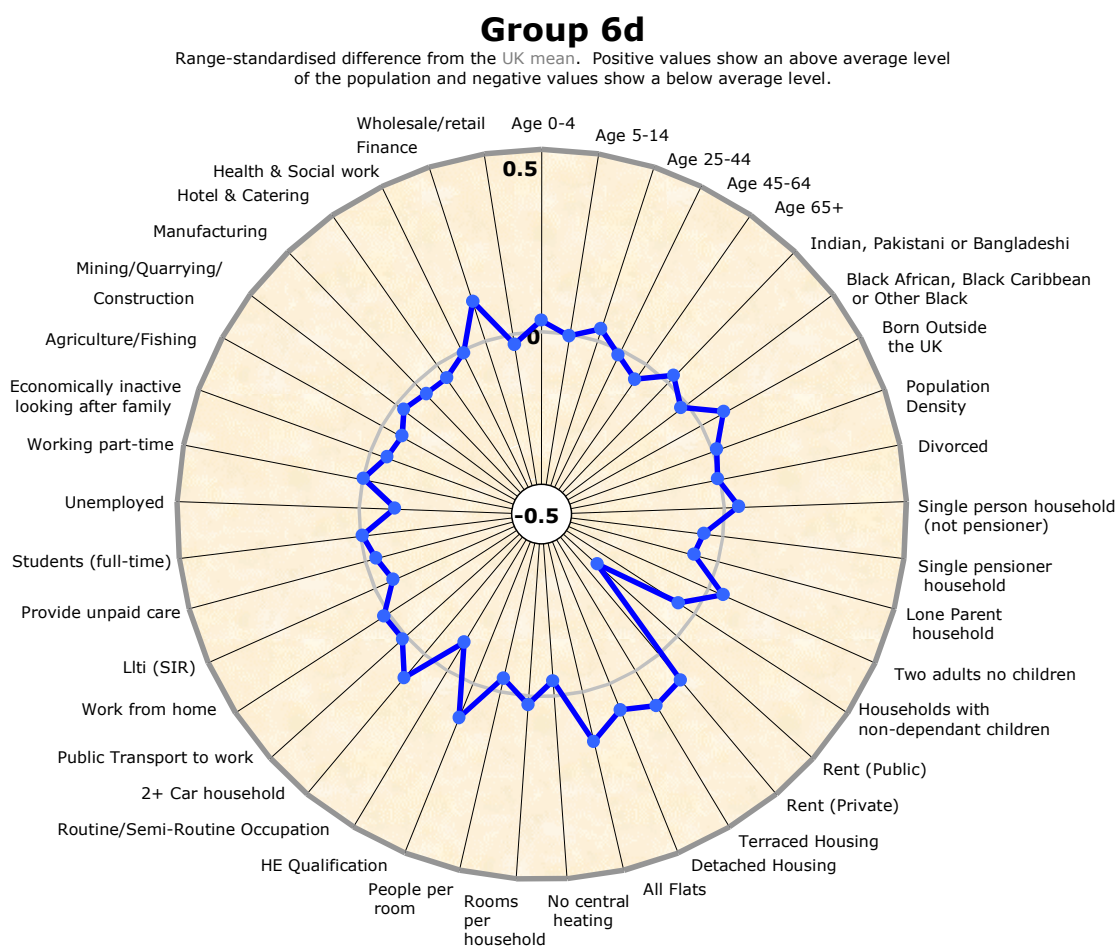

- Rent (Public)

- Age 5-14
- Divorced
- Students (full-time)
- Working part-time

The variables with proportions close to the national average are²

- Black African, Black Caribbean or Other Black
- Age 45-64
- Health and Social work employment

There are no variables with proportions far above the national average³

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6a1: Settled Households (1)

The members of this subgroup can be found in areas of concentration in the North-West of England and Southern Wales. There is one ward, Consett East in the North-East, that has 60% of its output areas classified in this subgroup. There are 4 other wards that have 50% or more including Blandford Damory Down, Clevedon Yeo and Dodington in the South-West and St. Christopher's in Wales. Within this subgroup:

The variables with proportions far below the national average are¹

- All Flats
- Rent (Public)

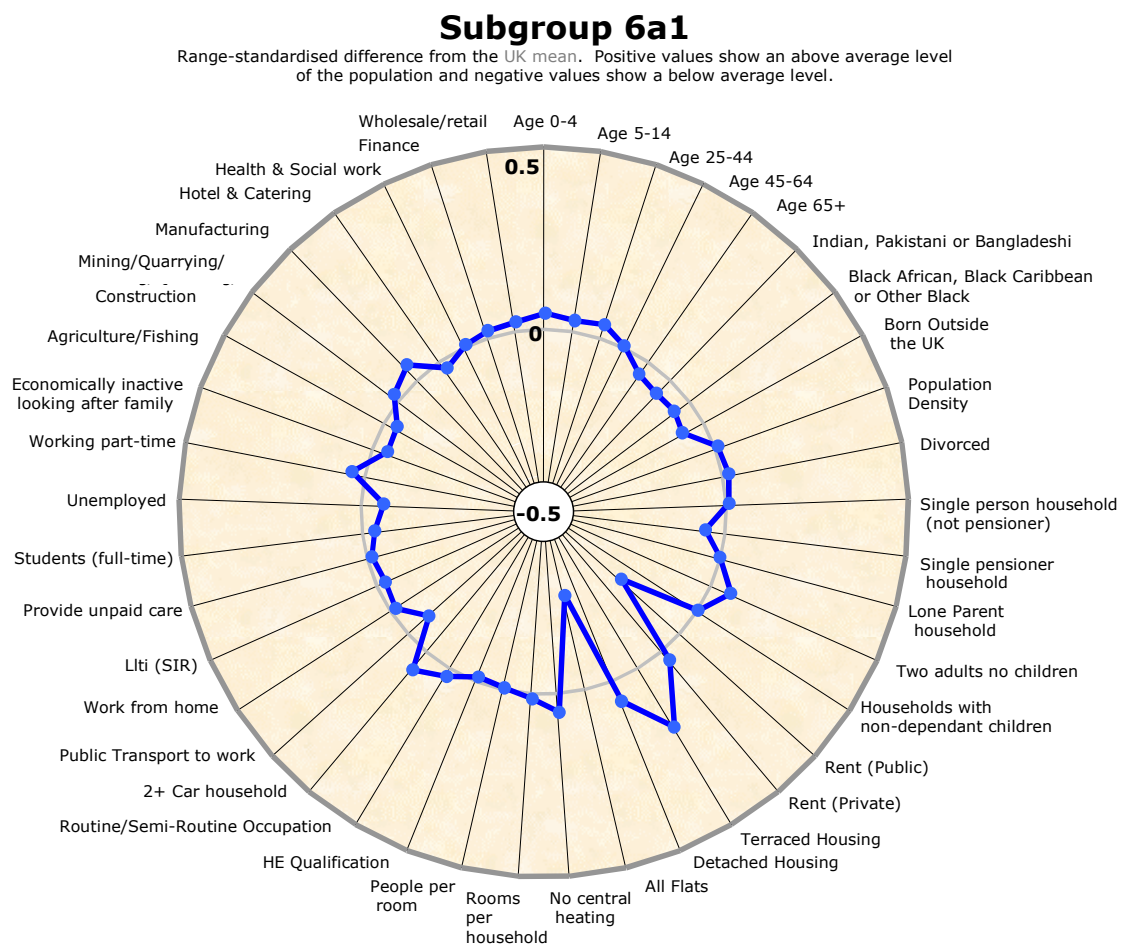

The variables with proportions close to the national average are²

- HE Qualification
- Work from home
- Provide unpaid care
- Age 45-64

- People per room
- Lone Parent household
- Health and Social work employment
- Households with non-dependant children
- Population Density
- Single person household (not pensioner)

The variable with proportions far above the national average is³

- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6b1: Least Divergent (1)

The members of this subgroup are spread throughout the UK. There is one ward, Tresco in the South West, that has all its output areas classified in this subgroup. There are 6 other wards that have 50% or more including Aberteifi/Cardigan - Teifi, Borth, Cadnant and Hay in Wales, Kendal Fell in the North-West and Seckford in the East of England. Within this subgroup:

The variable with proportions far below the national average is¹

- Public Transport to work

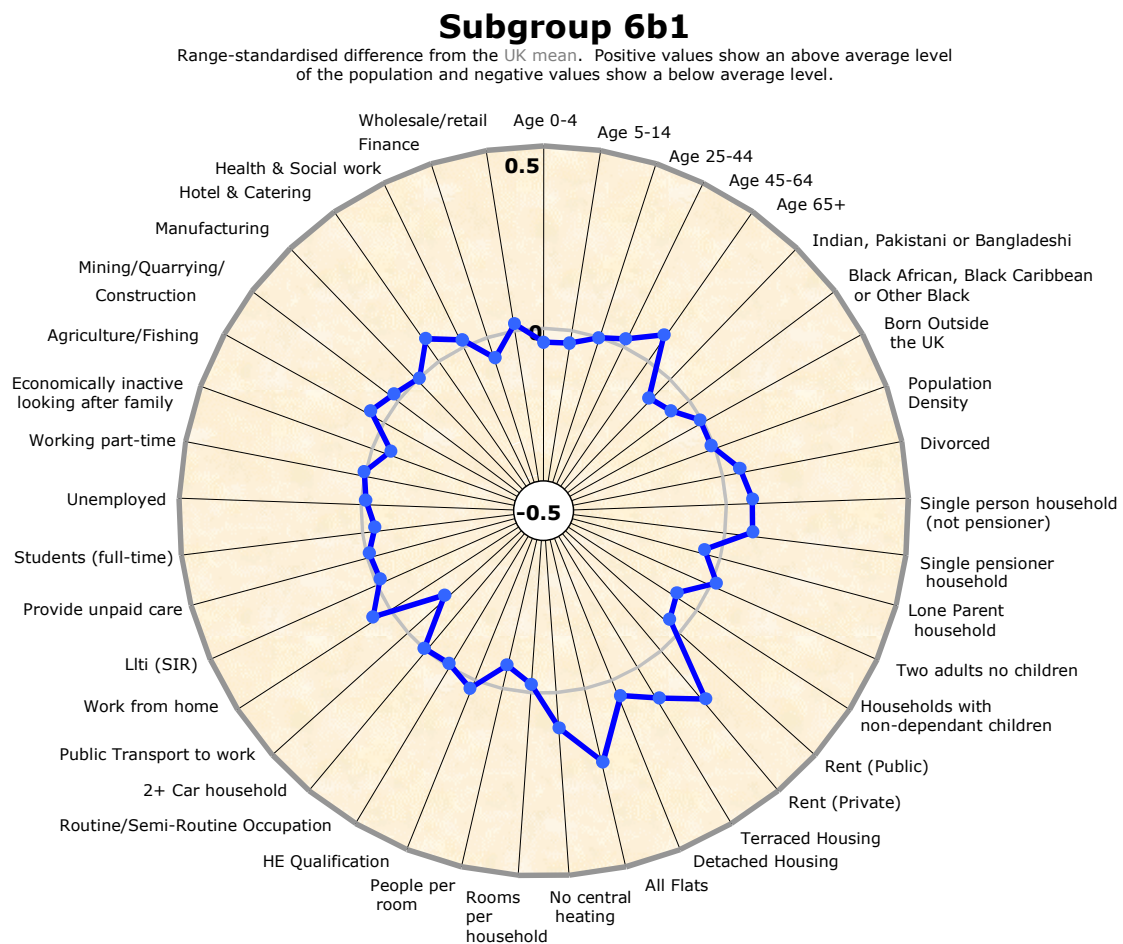

The variables with proportions close to the national average are²

- Unemployed
- Age 25-44
- Population Density
- Born Outside the UK
- Manufacturing employment

- Rooms per household
- Lti (SIR)
- Provide unpaid care
- Working part-time
- Routine/Semi-Routine Occupation
- Health and Social work employment
- Wholesale/retail trade employment
- 2+ Car household

The variables with proportions far above the national average are³

- Rent (Private)
- All Flats

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6b2: Least Divergent (2)

The members of this subgroup are concentrated around major city areas in Scotland and England. There is one ward, East Grinstead Baldwins in the South-East, that has 38% of its output areas classified in this subgroup. There are 11 other wards that have 30% or more including Amersham-on-the-Hill, Beaconsfield South, Burnham Lent Rise, Hanworth, Peacehaven West, Pembury and Theale in the South-East, Apsley and Northchurch in the East of England, Glen in the East-Midlands and St. Asaph East in Wales. Within this subgroup:

There are no variables with proportions far below the national average¹

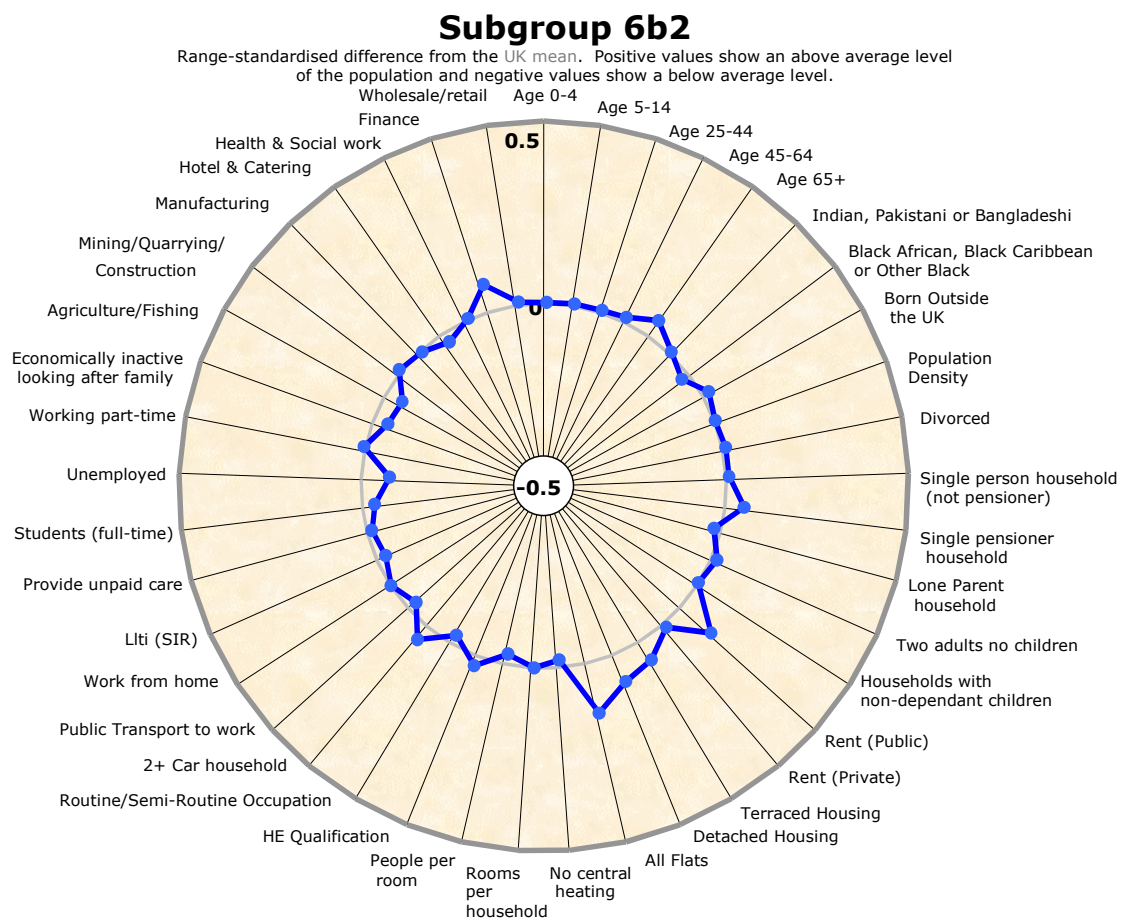

The variables with proportions close to the national average are²

- Provide unpaid care
- Health and Social work employment
- Age 45-64
- Manufacturing employment
- Wholesale/retail trade employment
- Divorced
- Public Transport to work
- Age 25-44
- Population Density

- Indian, Pakistani or Bangladeshi
- Rooms per household
- Lti (SIR)
- Routine/Semi-Routine Occupation
- Age 5-14
- Households with non-dependant children
- Age 0-4
- Single person household (not pensioner)

The variable with proportions far above the national average is³

- All Flats

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6b3: Least Divergent (3)

The members of this subgroup are spread throughout the UK with some concentration in the North-West. There are two wards, Northwich Winnington and Ulverston North in the North-West, that have 43% of their output areas classified in this subgroup. There are 4 other wards that have 35% or more including Esclusham and Fishguard North West in Wales, Latimer in the East-Midlands and Sidemoor in the West-Midlands. Within this subgroup:

There are no variables with proportions far below the national average¹

The variables with proportions close to the national average are²

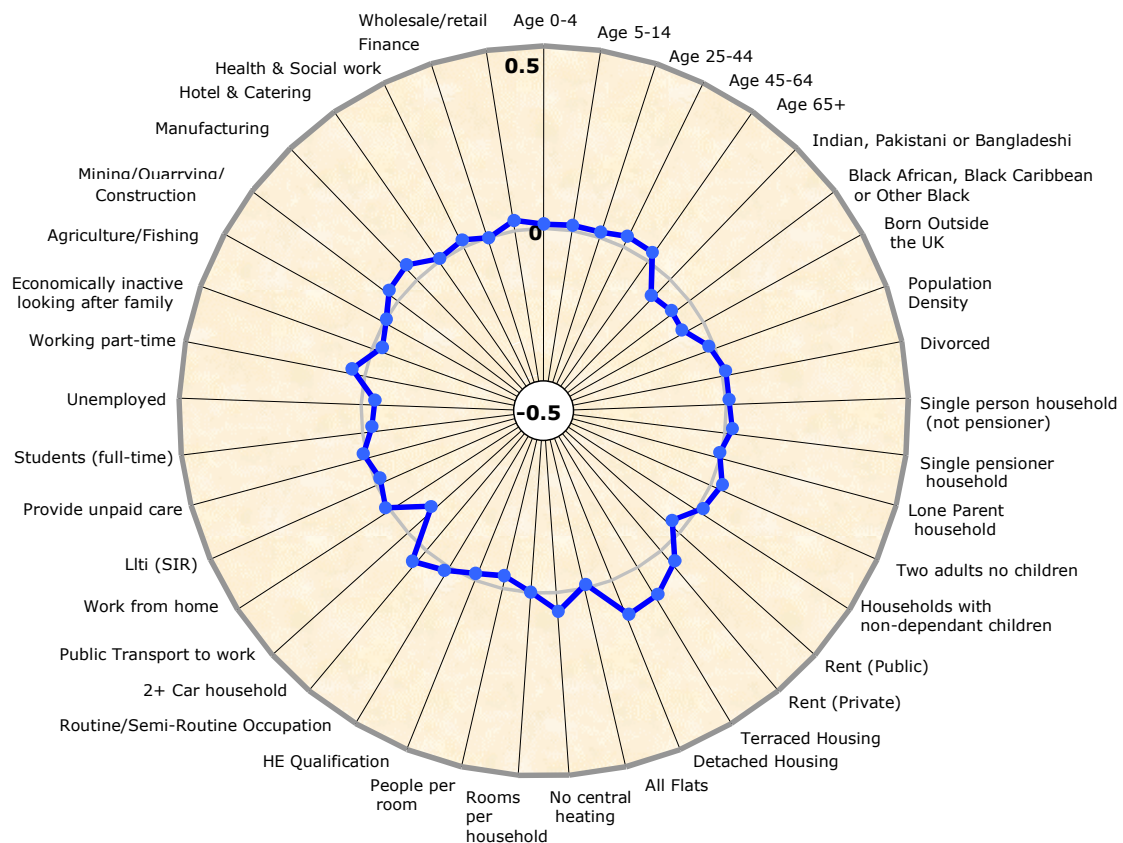

- Financial intermediation employment
- Lti (SIR)
- Agriculture/Fishing employment
- Hotel & Catering employment
- Lone Parent household
- HE Qualification

- Age 0-4
- Age 25-44
- Age 5-14
- All Flats
- Divorced
- Single person household (not pensioner)
- Health and Social work employment

There are no variables with proportions far above the national average³

Subgroup 6b3

Range-standardised difference from the UK mean. Positive values show an above average level of the population and negative values show a below average level.

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6c1: Young Families in Terraced Homes (1)

The members of this subgroup can be found in concentration mainly around city areas in the North-West and West-Midlands. There is one ward, Fratton in the South-East, that has 71% of its output areas classified in this subgroup. There are 6 other wards that have 55% or more including Peel and Tulketh in the North-West, Central Southsea and Milton in the South-East, Westmoreland in the South-West and Treforest in Wales. Within this subgroup:

The variable with proportions far below the national average is¹

- Detached Housing

The variables with proportions close to the national average are²

- Rooms per household
- Hotel & Catering employment
- All Flats
- Mining/Quarrying/Construction employment
- People per room
- Lti (SIR)
- Black African, Black Caribbean or Other Black

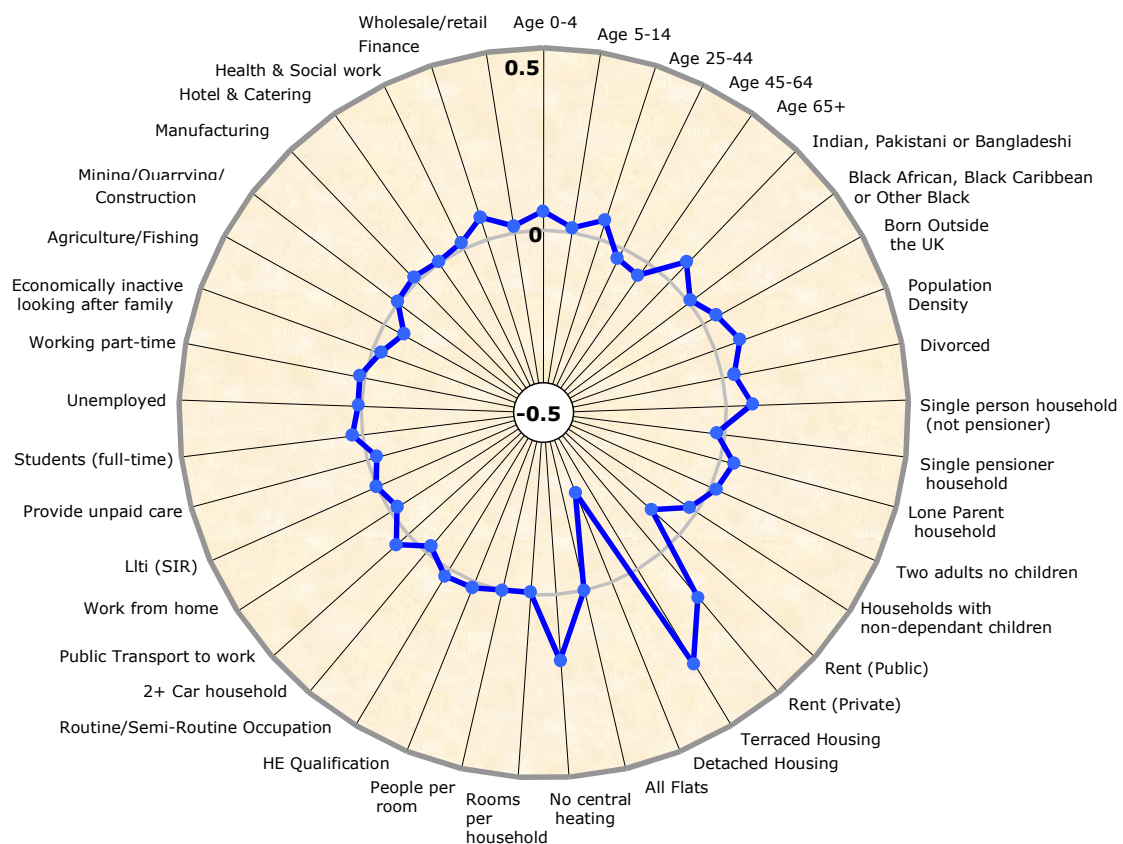

- Unemployed
- Age 5-14
- Manufacturing employment
- Health and Social work employment
- Wholesale/retail trade employment
- Working part-time

The variables with proportions far above the national average are³

- Rent (Private)
- No central heating
- Terraced Housing

Subgroup 6c1

Range-standardised difference from the UK mean. Positive values show an above average level of the population and negative values show a below average level.

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6c2: Young Families in Terraced Homes (2)

The members of this subgroup have some concentration in the North-West, Yorkshire and the Humber and South Wales. There is one ward, Central in Yorkshire and the Humber, that has 94% of its output areas classified in this subgroup. There are 6 other wards that have 60% or more including Bridgwater Eastover and Ellacombe in the South-West, Victoria in the North-West, Howard Town in the East-Midlands, Sheerness East in the South-East and Hiraal in Wales. Within this subgroup:

The variables with proportions far below the national average are¹

- Detached Housing
- Rent (Public)

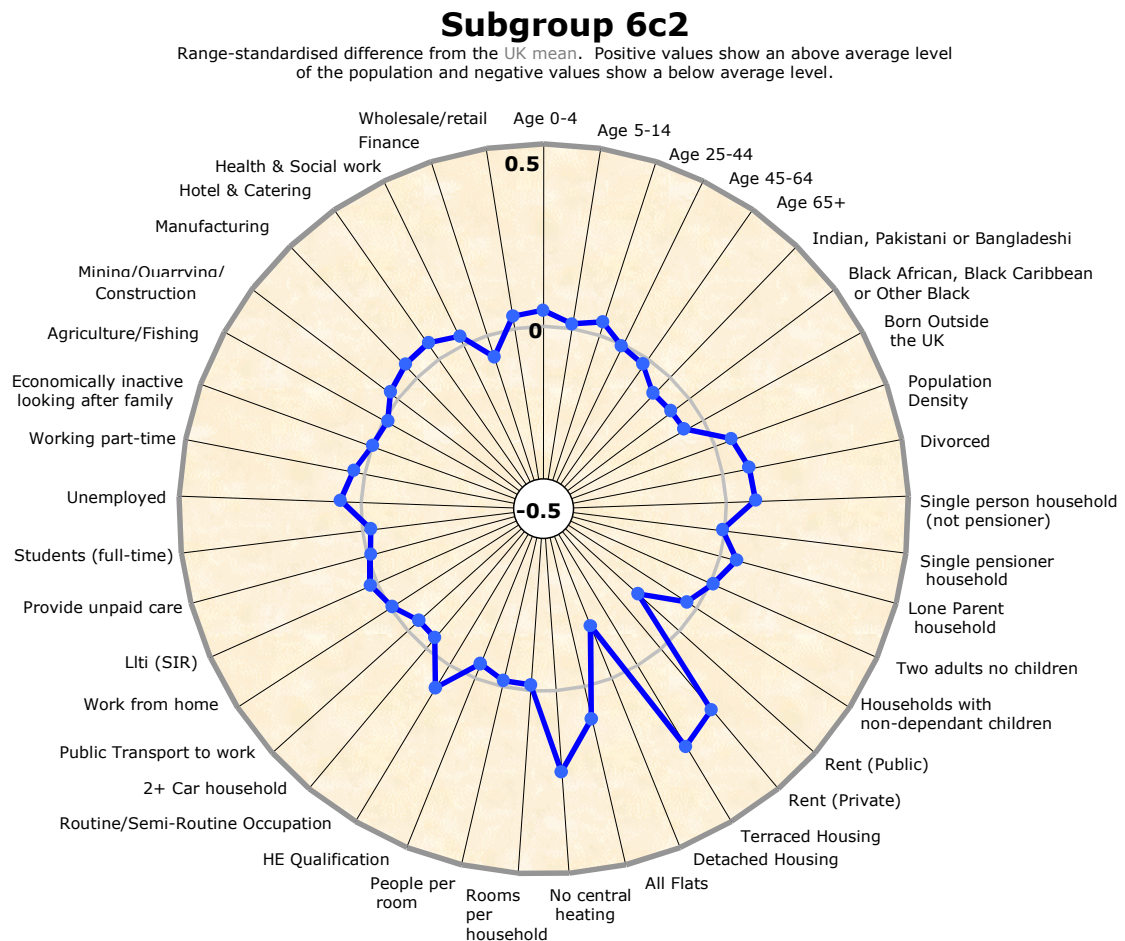

The variables with proportions close to the national average are²

- Provide unpaid care
- Age 45-64
- Work from home

- Single pensioner household
- Economically inactive looking after family
- Age 5-14
- Two adults no children

The variables with proportions far above the national average are³

- Rent (Private)
- No central heating
- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6d1: Aspiring Households (1)

The members of this subgroup can be found mainly across England and in particular around London. There is one ward, Bicester South in the South-East, that has 73% of its output areas classified in this subgroup. There are 5 other wards that have 55% or more including Castle and Rooksdown in the South-East, Baldock East and Chafford and North Stifford in East of England and Bradley Stoke Bowsland in the South-West. Within this subgroup:

The variable with proportions far below the national average is¹

- Rent (Public)

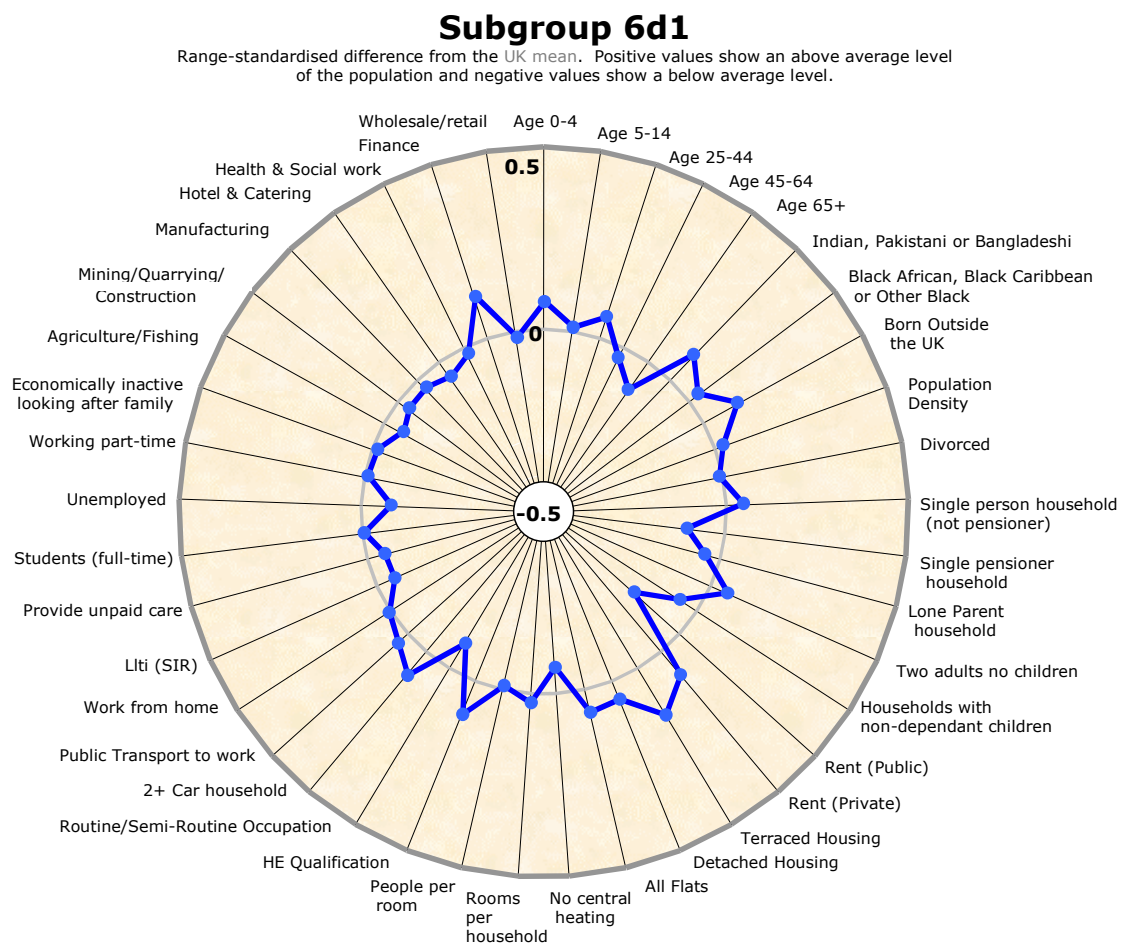

- Working part-time
- Students (full-time)
- Age 5-14
- Work from home

The variables with proportions close to the national average are²

- Economically inactive looking after family
- People per room
- Divorced

The variable with proportions far above the national average is³

- Terraced Housing

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean

2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean

3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean

Subgroup 6d2: Aspiring Households (2)

The members of this subgroup are spread across England and Scotland with concentrations around both Edinburgh and London. There is one ward, Leigh in the East of England, that has 61% of its output areas classified in this subgroup. There are 7 other wards that have 40% or more including Ashford Town and Folkestone Sandgate in the South-East, Stonelaw in Scotland, Cramlington South East in the North-East, Ansdell in the North-West, Stanstead Abbots in the East of England and Garth in Wales. Within this subgroup:

The variable with proportions far below the national average is¹

- Rent (Public)

The variables with proportions close to the national average are²

- Age 5-14
- Mining/Quarrying/Construction employment
- Age 0-4
- Provide unpaid care
- Public Transport to work

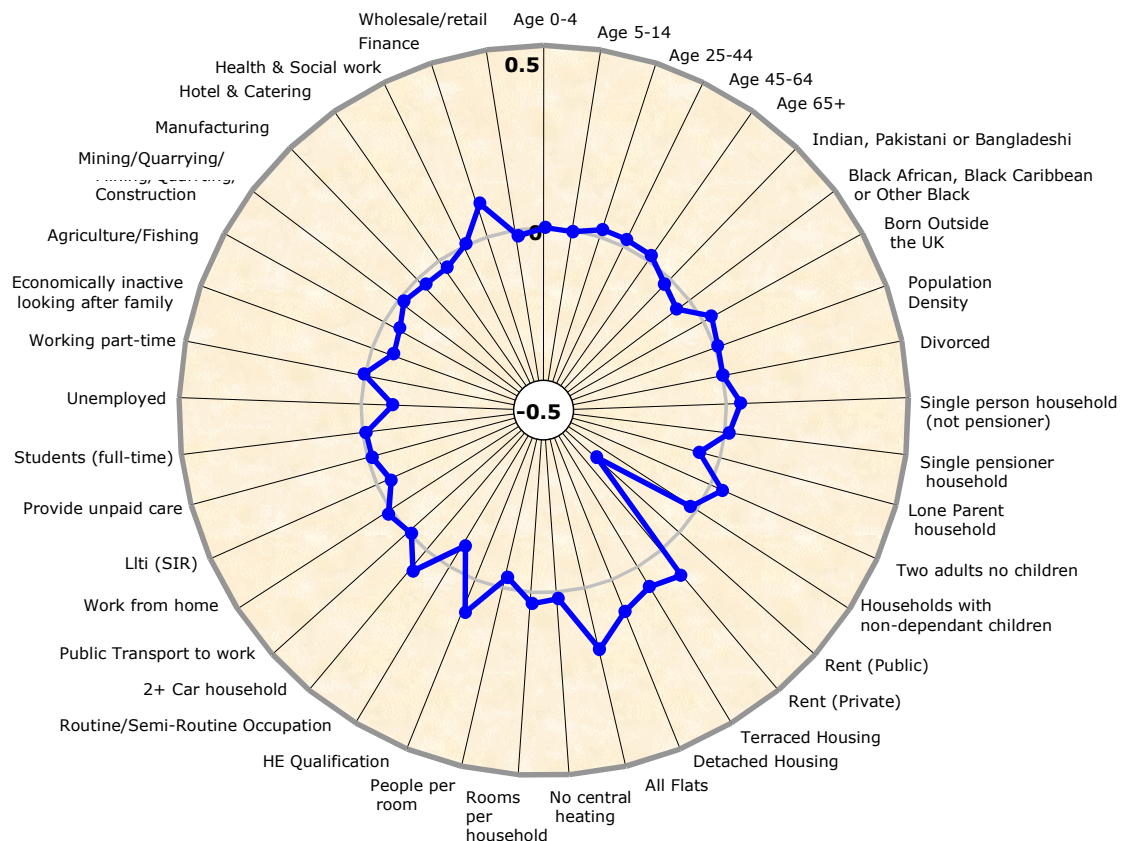

- Divorced
- Students (full-time)
- Health and Social work employment
- Population Density
- Age 65+
- Working part-time
- No central heating

The variable with proportions far above the national average is³

- All Flats

Subgroup 6d2

Range-standardised difference from the UK mean. Positive values show an above average level of the population and negative values show a below average level.

1 For a variable to be 'far below average' it must have a difference of more than 0.15 below the UK mean
 2 For a variable to be 'close to the average' it must have a difference of 0.015 either below or above the UK mean
 3 For a variable to be 'far above average' it must have a difference of more than 0.15 above the UK mean
